

NEVER PAY FOR TV AGAIN

“This Report Will Tell You What You Have To Buy and Where You Have to Go to Get Completely Free Television for Life...”

I hope this information is as beneficial to you as it was to me....

Brought to you by.... www.CheapSatelliteReceivers.com

To watch endless free TV, all you need to do is own a Free to Air (FTA) Satellite receiver. It's no big secret, no big conspiracy. FTA satellite receivers are a satellite receiver designed to pick up ANY image transferred to it from the many satellites floating around in space above us every day and night. Anyone can simply buy one of these receivers, find or buy an old satellite dish, tune it in and have free television from now on.

No more throwing away your hard earned cash to the CABLE AND SATELLITE FAT CATS.

I know I haven't for years....this is No B.S.!

It is truly is that simple and it's definitely not some big secret.

People have been doing FTA for years. Remember those big ole satellites we used to see in people's yards in the eighties and early nineties. That was the beginning of FTA and a lot of those that we've seen in the past were in fact FTA satellites.

Getting a FTA receiver is quite easy. My favorite place is www.CheapSatelliteReceivers.com. They have the newest and best models at auction and wholesale prices. You can also search FTA on any major search engines and find dealers all over the world.

Out with the old and in with the new, nowadays they have high definition models that are amazing and can get better definition than any of the high definition models that the big providers use. The older and used models are still very popular and work very well. FTA receivers are just like computers every few months a company will come out with a newer and more efficient model.

I myself have an older model and wouldn't trade it in for the world. Some things are just too good to let go of. Below are some of the best receivers to own:

- Nfusion
- SonicView
- Coolsat
- Pansat
- Viewsat
- Fortec

You *don't have to worry* when purchasing one of these satellite receivers. They are completely free to be sold and to own. Some people think that because a FTA receiver can get free TV, it must be illegal. This is **NOT** at all the case. There are **FREE** networks all across the US and all around the world. FTA is much bigger in other countries than the US. Just about anyone, anywhere can tune in to and watch all the free TV they want. It's happening everyday all around the world and getting bigger and bigger everyday.

It's like a hidden secret that people just do not know about. Why..??? Because the more people that know about it, the less cash some cable or satellite fat cat is going to make.

See the thing is, free to air satellite receivers also make it very easy for one to "hack" into all the biggest satellite services all across the United States and all around the world and access all their channels and services. Now, It **IS** illegal to hack into a satellite providers service and *steal* their encrypted channels.

**I or this report DO NOT
Condone Illegal Behaviors in ANY WAY.**

I just wanted to write this report to let everyone know FTA or Free to Air receiver's can provide free TV to all for a very low one-time fee and I think everyone should at least know about it. If they choose to stick with the fat cat providers, so be it... but at least everyone knows there is a choice or alternative.

Once you've acquired a FTA satellite receiver, all you have to do is search online for "free to air satellite forums". There are hundreds of these forums and they are very informative and easy to use. They will teach you more in a night than I can here in a lifetime. Step by step instructions on "how to set up your receiver" or "what the latest free to air channel lists are" and everything else you need to know about FTA television. Some of my favorite FTA forums are:

<http://www.f2atv.com>

<http://www.dssgeeks.com>

Just make sure you understand that this process is SO simple. Anyone with a little computer forum experience can have unlimited TV forever, and believe me... I suggest doing so.

**Quit throwing your hard-earned cash away
to the Cable/Satellite Companies, you can
watch quality TV for **FREE..!****

Be sure to visit www.CheapSatelliteReceivers.com for all your FTA satellite needs. They have all the latest, greatest FTA receivers at auction site prices.
